Project management and business analysis are two disciplines that are becoming more strategic for many companies. Project management focuses on the creation of the "product, service, or result" of the project in order to meet its objectives. Business analysis aims at understanding the needs of the business stakeholders and at defining the characteristics of the solution to meeting those needs.

Functional testing is a quality assurance (QA) process and a type of black-box testing that bases its test cases on the specifications of the software component under test. Functions are tested by feeding them input and examining the output, and internal program structure is rarely considered (unlike white-box testing). Functional testing is conducted to evaluate the compliance of a system or ...
