### [What Is A Stop-Loss In Forex Trading? And How Do You Set It?](#)

This is a great indicator for taking quick, consistant profit from the Forex Market. My results from the last three days trading are 43 trades placed, 37 winning trades. I personally either set my Profit target of 20-30 pips or I manually close at change of signal depending on market conditions. Trading with the main trend in higher timeframes can produce great results. Great work! Thank you ...

It's been a long time, since 2008, that I've been on Forex; I started several times and several times left it for a long while, simply because my results left much to be desired - profit-loss was spinning around the "zero" mark. I purchased Forex Tester in autumn 2013. I began to use it and to build my trading strategy.

I recommend ignoring a set-and-forget EA or trading robot, which usually fails over the long-term. Those who favor a 100% hands-free approach will find a better choice with social trading platforms. Retail traders seeking an edge should look for EAs that will work alongside them and help identify trading signals based on their strategy. It will take away repetitive analyses and emotion-based ...

Don't forget, signals are only as good as the person or company providing them. While certain signal providers will possess a much better success rate than others, there is no guarantee that you will make money. Ultimately, nobody can predict the future – as the forex markets often operate in an irrational manner.

Within the forex market, arbitrage is used to profit from differences in the quoted prices of currencies. However, these differences do not occur between two currencies alone, so the trader must use "triangular arbitrage," which incorporates three different trades, to profit from differences in prices. For example, imagine that you notice the following quoted prices: 20.00 USD/MXN, 0.2000 MXN ...
